Art Unit: 2833

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-9, 11-15, 18, 19, 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by French 2221829.

Disclosed (Fig. 4) are first and second contact legs in a mirror image relationship and a connecting member 13 therebetween, each leg having an elastically deformable beam 18 and a second beam 17 forming a discrete engaging area (bend) therebetween, a first hinge (bend) between 17 and 18, and a second hinge (bend) between 13 and 14. 19 could engage the wall of a small sized circuit board through and can thus be considered a second discrete engaging area.

Claim 10 is objected to because of the following informalities: it is unclear what the mating portions are opposed to. Appropriate correction is required.

Claims 3, 4, 10, 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 20-24 and 27 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: French 2221829 does not disclose a beam having the claimed orthogonal shoulder region or the opposing mating portion, nor would it have been obvious to form the French contact with same in view of any of the other prior art of record.

Art Unit: 2833

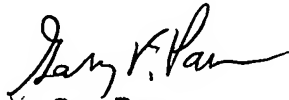

The other references cited on Form 892 disclose similar contact retention means.
